

The background of the image shows two white electrical plugs resting on a wooden surface with a prominent grain. The plug in the upper left is a standard two-pronged plug with a grounding pin. The plug in the lower right is a more complex, multi-pronged plug, possibly a universal or industrial type. A semi-transparent white rectangular box is overlaid on the left side of the image, containing text.

More than 15 years
of experiences

More than 3,500 customer
from 36 countries

TÜV-certified

Oldest guarantee
system

Highest guarantee
volume

Market share of
around 50% *

Worldwide
cooperation partners

* measured by the
guarantee volume
from all registered
producers

About us

1. Experiences:

weee full-service has existed ever since the ElektroG came into force in 2005. This means our WEEE Guarantee System is the oldest guarantee system on the market. We now offer more than fifteen years of experience.

2. Highest guarantee volume & beneficial conditions:

Our guarantee is worth over 400 million euros, the highest volume on the market. This means we can offer our customers lower premiums for our WEEE Guarantee System.

3. International:

We are a multicultural team – drawn from six nations, speaking nine languages and serving customers from 36 countries. We have set up an international network and are expanding our it all the time.

4. Close contact with lawmakers:

Our origins in the digital association Bitkom mean that we are close to the political stage in Berlin, and always up to date concerning the latest legislation. Often, we can tell early on in which direction the legal framework is shifting.
