# Service for electrical and electronic equipment

WEEE Directive (2012/19/EU)

## Background

If you are a producer, retailer or importer placing electrical and electronic equipment on the market in a European country, your company is subject to the European WEEE Directive (2012/19/EU). Due to the nature of the directive, each member state must transpose the European requirements into national law. As a result, there are different country-specific requirements that need to be met.

## Our services

We assist you in ensuring that your electrical and electronic equipment is distributed in accordance with European and national requirements. Our Germany and EU service offers you the opportunity for individual consultation.

# Service for batteries

Battery Regulation (2023/1542/EU)

## Background

If you are a producer, distributor or importer placing batteries or products containing batteries or accumulators on the market in a European country, your business model is subject to the European Battery Regulation (2023/1542/EU). Due to the nature of the regulation, the requirements apply directly in each member state.

## Our services

We assist you in ensuring that your batteries are distributed in compliance with the European Battery Regulation. Our Germany and EU service offers you the opportunity for individual consultation.

# Transparency regarding the cost model

## Our cost calculator for Germany

Get a non-binding quote for our service for electrical appliances and batteries with our fee calculator.

If your company is not based in Germany or sells devices for professional use which are not normally used in private households (B2B equipment), we will contact you after receiving your request with an individual offer according to your specifications. With the cost calculator you receive an overview of the minimum costs.

# Service for packaging

Packaging Directive (94/62/EC)

## Background

If you are a producer, distributor, importer or online retailer placing packaging on the market in a European country, your business model is subject to the European Packaging Directive (EU Directive 94/62/EC). Due to the nature of the directive, each country must transpose the European requirements into national law. As a result, there are different country-specific requirements that need to be met.

## Our services

We support you in distributing your packaging in compliance with the European and national requirements. Our Germany and EU service offers you the opportunity for individual consultation.

# Bitkom Servicegesellschaft mbH

## Serviceportfolio

The Bitkom Servicegesellschaft is a subsidiary of Bitkom e.V. with the following business areas:

- The **Bitkom events** are about the future of the digital economy. At our major events, we regularly bring global players and startups, politics and science together for mutual exchange.
  - The **Bitkom Akademie** is the first point of contact for further training for specialists and managers on IT topics and digital trends.
  - **Bitkom Consult** advises companies on all legal, technological and organizational questions relating to data protection.
  - **Bitkom Research** conducts extensive studies on current digital topics in business and society.
  - At **Bitkom Compliance Solutions**, we provide a comprehensive compliance solution for producers, distributors and importers of electrical equipment, batteries and packaging across Europe, ensuring their products are sold and disposed of in accordance with the relevant regulations.
- Bitkom e.V. represents more than 2,200 member companies from the digital economy.
  - The members include more than 1,000 medium-sized companies, over 500 startups and almost all global players.
  - Bitkom promotes and drives the digital transformation of the German economy and advocates broad social participation in digital developments. The aim is to make Germany an efficient and sovereign digital location.
